Company description

GomSpace is a 'new space' company that was founded in 2007 by Ph.D. students at the Aalborg University in Denmark. Since, GomSpace has developed into a leading nanosatellite manufacturer with a global reach and c.130 employees. GomSpace was listed on Nasdaq First North in 2016.

GomSpace

Cancelled A&M project not a major surprise

Cancellation of the Aerial & Maritime (A&M) project in Q2 was not a major surprise given recent writedowns. We remove SEK1 per share from our valuation approach to reflect this. Q2 revenue and EBIT, adjusted for A&M settlements, came in slightly shy of our estimates but what we find important is that GomSpace reiterated its 2020 revenue guidance. It also continues to report improving cash flows, ending Q2 with SEK129m in cash.

- Q2 20 review. Adjusting for one-offs relating to the A&M cancellation and bad debt provisions, Q2 was slightly below our sales and EBIT estimates. In Q2, GomSpace cancelled the A&M project, resulting in c.SEK12m depreciation of equity interest but not affecting 2020 revenue guidance. This comes after the Q4 19 writedown of a large part of its A&M holding, so we argue it is not a major surprise. Adjusting for customer settlements in Q2 20 and Q2 19, we estimate underlying revenues grew c.54% y/y in Q2 and cost control continues to be good. Operational cash flow is improving year on year and, with favourable working capital effects and a tax receivable, the cash position rose by SEK10m q/q to SEK129m. In Q2, GomSpace's net order intake fell by 31% y/y to SEK42m, with the order backlog at SEK122m at end-Q2. GomSpace's CEO commented on expected orders for H2 20, to help 2021. Some 58% of the order backlog is from the science business area, another reason for the reiterated 2020 revenue guidance.
- Pandemic increases risk of client delays. We expect satellite launch delays in this
 nascent market and many of GomSpace's most important clients are currently facing delays
 due to funding issues or a crowded/grounded launch market. Most companies need to pass
 certain milestones (such as satellite launches) to ensure further financing, which adds to
 delays. Commercial orders have higher gross margins than science orders.
- Estimate revisions. We lower our 2020-22 sales estimates slightly, partly on the lower order backlog quarter on quarter. We are awaiting further orders to derisk our 2021-22 growth estimates.
- Valuation. We continue to see value in the shares but also acknowledge that this is not
 without risk, as clients need to progress further with their projects in order for this to
 materialise, i.e. the outlook for commercial orders needs to become clearer, which might
 take until within 2021. In addition to estimate revisions, we have removed SEK1 for A&M
 from our valuation range, which we lower to SEK7-26 (from SEK9-28 previously).

^{*} Price as at close on 20 July 2020

Q2 20 summary

Q2 20 earnings slightly below our estimate but cash position is comforting

GomSpace reported revenue of SEK43m, or c.SEK38m adjusted for a positive one-off relating to the A&M settlement (previously disclosed in June). We had estimated SEK42m in revenues. Reported revenue was down 19% y/y but if we adjust for the Sky & Space settlement in Q2 19, revenues were up 79% y/y (and up c.54% y/y if we also adjust for A&M).

Adjusted EBIT was SEK-17.7m versus our SEK-7m estimate; however, non-cash charges of c.SEK-7m had a negative effect (see below). For GomSpace currently, we argue that the most important aspect of the Q2 report was the reiterated 2020 revenue guidance and cash position (see below).

In Q2, GomSpace cancelled the A&M spin-out project but it plans to retain the assets in terms of eight already-built satellites, booked at SEK0 in the balance sheet, which might be positive for margins ahead if it can sell the satellites. The cancellation resulted in a depreciation of equity interest of c.SEK12m and a reduction in the backlog of c.SEK14m but it does not affect the 2020 revenue outlook.

Targets reiterated

GomSpace reiterated its 2020 revenue guidance of SEK160-185m and its target of positive operational cash flow.

Q2 reported figures

Q2 reported revenue was SEK42.7m but in the deviation table below we adjust for the SEK4.8m positive effect from the A&M settlement and add back c.SEK2m to the gross profit. We have thus adjusted EBITDA and EBIT by c.SEK2.8m. The writedown of SEK8.6m related to the A&M settlement is included in 'share of profit from associates', below the EBIT line in the profit and loss statement. Included in opex is a SEK4.3m bad debt provision (which we do not adjust for below).

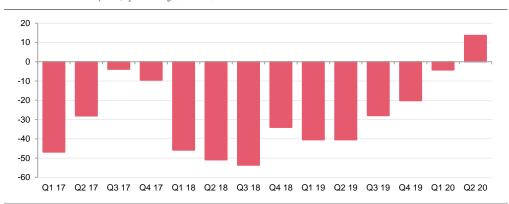

Table 1: Q2 20 deviation between actual results and estimates

SEKm	Q2 20A	Q2 20E	Deviation	Q2 19

Cash flow

Cash flow continued to improve year on year and GomSpace ended Q2 with a comfortable SEK129m cash position. In Q2, reported operating cash flow was SEK15.5m. This includes changes in working capital of SEK15m and SEK6m received in tax as part of an aid package. In Q2 19, operating cash flow was SEK-34.4m and, while changes in working capital affected Q2 19 slightly negatively, the year-on-year improvement is significant, due partly to the cost-restructuring programme. Because of the favourable working capital and tax in Q2, free cash flow inflected upwards in Q2. GomSpace reiterated its target of positive operating cash flow in connection with the Q2 report. The cash position at end-Q2 amounted to SEK129m.

Chart 1: Free cash flow, quarterly (SEKm)

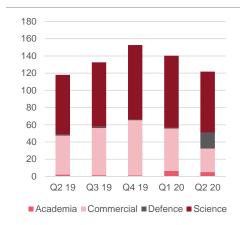

Source: Company data, Danske Bank Equity Research estimates

Order intake

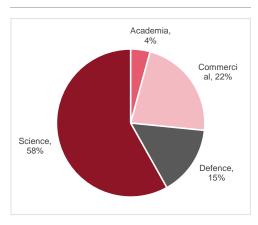

Q2 order intake was down 31% y/y but due to the current order book size (SEK121m) and H1 booked revenues of SEK83m, GomSpace reiterated its 2020 revenue guidance of SEK160-185m (we estimate SEK172m). The CEO also commented on expected orders for H2, which would help 2021.

Project pipeline

We highlight three important projects that could be scaled up to significant volume orders over the next two to four years. Note that the project pipeline is not limited to these projects. Clients securing funding are key for the success of the projects.

Not for US distribution

Notable recent orders

- Q4 19: Lockheed Martin Space (US)/Orbital Micro Systems (UK). This is an important contract to build a 6U nano-satellite for Lockheed Martin, with the end-customer being Orbital Micro System. Lockheed Martin is set to finance the design/build process but, more importantly, it is due to provide technical assistance, review, test and, if satisfied, approve the work done by GomSpace a strategically important quality stamp. The contract is worth SEK17m, with revenue recognition throughout 2020. It is the first deal with Lockheed Martin for GomSpace and is part of an industrial co-operation commitment to Denmark (but there were still other competitors for this contract).
- Q4 19: UnseenLabs (France). GomSpace announced an SEK18.6m order in Q1 20 at the
 client's request but had taken and booked it in Q4 19. The order from UnseenLabs is to
 conclude the design and delivery of nano-satellite platforms, a continuation of the
 collaboration between the two companies. UnseenLabs aims to provide maritime
 surveillance systems. The contract is due for fulfilment in 2020.
- Q4 19: North American geo-intelligence customer order. This is a SEK8m order with
 delivery in 2020 for an existing North American customer, to provide GomSpace's Software
 Defined Radio and antennas for a customer in the geo-intelligence industry. In addition, it
 is strategically important for a Danish company to supply intelligence payload to what we
 believe is a US company.
- Q2 20: SEK19m order for a Norwegian military communications satellite (for the research institute Norwegian Defence Research Establishment [FFI]), with the launch planned in October 2021. We expect revenue recognition to be spread out up until Q3 21.

Aistech

Aistech is a peer to A&M with a similar proposition, i.e. to offer aircraft tracking over the North and South Poles and different types of asset tracking. The company entered into a framework delivery agreement with GomSpace in September 2017 for delivery of up to 100 satellites by 2022. The contract is worth up to EUR12.5m. The first 10 satellites in the Danu constellation were scheduled for launch in late 2019; hence, if the initial phase of this constellation is successful, we find it likely the company will place additional orders with GomSpace. However, we gather that the Danu constellation launches have been delayed, possibly due to funding. Further to the equipment-supply agreement, GomSpace has also entered a five-year data-supply agreement, started in 2018. The agreement is worth USD1-8m, with the range driven by optionality in the agreement.

Aistech is held privately and we have no insight into its financials but assume it will need to raise equity in order to fulfil its commitments to GomSpace. In July 2018, GomSpace signed a follow-up order, under the initial frame agreement, worth EUR1.4m and delivered on this order in Q1 19. We believe the orders announced by GomSpace relate to the Danu project but, on top of this, Aistech has another planned constellation, the Hydra constellation. To our knowledge, Aistech plans to schedule its first four satellites for launch in 2020 and plans that the total constellation will contain 30 satellites. Despite no insight, we believe this could be delayed given the global shutdowns. Although the planned constellation is smaller than Danu (100), the satellites are larger (six units versus two units for Danu), so the supply value for this constellation could very well be similar to the EUR12.5m in potential order value for the equipment for Danu. Given normal lead times, if the constellation moves ahead and if GomSpace is the supplier, we believe we could also see orders for the Hydra constellation within the next one to two years.

Kleos Space

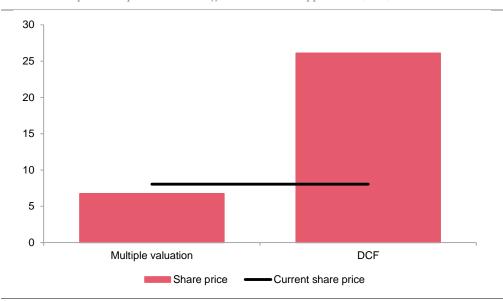

Kleos Space, a Luxembourg-based space technology operator, recently floated on the Australian stock market. Kleos Space aims to guard borders, protect assets and save lives by delivering global activity-based intelligence and geolocation as a service. The first Kleos Space satellite system, known as Kleos Scouting Mission (KSM), is set to perform a technology demonstration that would be the keystone for a subsequent global high-capacity constellation. GomSpace has won the initial EUR2.4m order to develop the scouting mission and, if successful, we expect the order to scale up as the constellation builds out further. Kleos accounted for 10% of group revenues in Q1 19 (SEK3m) and 28% in Q4 18 (SEK11m). Recently, KSM passed a milestone, the Critical Design Review, and is waiting to launch. Kleos postponed the launch from Q2 19 and had been aiming for Q1 20 (according to nanosats.eu and Spaceflight Now) but we believe further delays are likely due to the lockdowns.

Our estimate is that neither Aistech nor Kleos makes up a material part of the current order backlog.

Valuation

We still see significant long-term potential following the uncertainty regarding the SAS order and the writedown of A&M, even though risk is set to stay high in the short term, as illustrated by the current mismatch between capacity and activity level. We lower our valuation range to SEK7-26 (from SEK9-28 previously).

Chart 4: Value per share potential with different valuation approaches (SEK)

Note: Price as at close on 20 July 2020

Source: Company data, , FactSet, Danske Bank Equity Research estimates

In our DCF, with a long-term market share approaching 10% and WACC of 11.9%, the value is SEK26 (previously SEK28). In this scenario, GomSpace reaches SEK1.5bn sales in 2028. We base our multiple valuation on EV/EBIT 2022E of 14.4x, reflecting the Nordic tech peer group's 2022E multiple discounted by two years, which gives us a value of SEK7 per share (previously SEK9). If we use 2023E EBIT as a basis for our multiple valuation, the non-discounted value would increase to SEK24 per share. In light of the uncertain outlook regarding timing of customer orders, we await more visibility before using our 2023 estimates as a basis for the multiple valuation. We have removed the SEK1 per share valuation for A&M from our valuation approach.

Risks

The most tangible risk we see for GomSpace is execution risk, as the company is gearing up for a significant increase in production. The industrialisation of production was set to commence in 2018 but due to customer delays production and revenues have yet to scale up significantly. However, going from low- to high-volume production is an inherently risky phase in a company's growth profile, as demonstrated by the current overcapacity situation. Another risk is customers' ability to secure external funding and meet their obligations to GomSpace. The large customers, and potential customers, are typically start-up companies aiming to build a satellite communication constellation. The predominant source of funding is externally raised equity and debt.

The launch of satellites could become a constraining factor in the event of high growth in the segment. A reduction in launch costs is a critical driver for the small-satellite market to grow to the high end of industry analysts' expectations. Based on our current projections for the market and GomSpace's growth, we do not see launch capacity constraints as an issue but these could limit growth significantly above our estimates.

Demand for low Earth orbit (LEO) based services is the core of small-satellite demand. This includes imagery-based intelligence, sensing activities such as radio-frequency mapping, automatic identification systems and weather monitoring. The demand for such services in space, in turn, requires continued downward pressure on costs (satellite assembly, increased modularisation and increased automation). In addition, it requires continued rapid technology development for components and systems. Our conclusion from visiting GomSpace's production facilities is that we are seeing exactly the increase in modularisation and automation of production that the research institute said is required to support growth in the small-satellite industry.

Competing systems developing more quickly than expected could hamper growth in small satellites. This includes breakthroughs when it comes to the relative value propositions and technology development of larger satellites. Other breakthroughs that risk hurting the relative benefits of small satellites could be terrestrial or airborne platforms.

Understanding the nature of an emerging, venture capital-funded industry

GomSpace operates in an emerging new industry with projects funded to a high degree by venture capital. Even if we are convinced that the potential is significant, the outcome of the planned projects is very difficult to forecast, given that they rely on external equity funding. This makes communication with the equity market very difficult, as there are a number of projects with significant potential but GomSpace's management does not control the funding of the projects. Consequently, the chances of success and the actual timing of projects are very difficult to forecast. Company forecasts based on these uncertain projects increase the volatility in the company's demand and, consequently, the accuracy of long-term forecasts. This is important to understand when investing in GomSpace. Our view remains that it is the right strategy to industrialise volume production of nano-satellites in order to achieve a market-leading position and drive growth in the industry.

Disclosures

This commissioned research report has been prepared by Equity Research, a division of Danske Bank A/S ('Danske Bank'). The authors of this research report are Viktor Högberg and Siri Ladow.

This commissioned research report should be considered marketing material, as it has been requested and paid for by GomSpace and has therefore not been prepared in accordance with the legal requirements designed to promote the independence of investment research. However, the report is still subject to prohibition on dealing ahead of the dissemination of the report.

Analust certification

Each research analyst responsible for the content of this commissioned research report certifies that the views expressed in the research report accurately reflect the research analyst's personal view about the financial instruments and issuers covered by the research report.

Regulation

Danske Bank is authorised and subject to regulation by the Danish Financial Supervisory Authority and is subject to the rules and regulation of the relevant regulators in all other jurisdictions where it conducts business. Danske Bank is subject to limited regulation by the Financial Conduct Authority and the Prudential Regulation Authority (UK). Details on the extent of the regulation by the Financial Conduct Authority and the Prudential Regulation Authority are available from Danske Bank on request.

Danske Bank's commissioned research reports are prepared in accordance with the recommendations of the Danish Securities Dealers Association.

Conflicts of interes

Danske Bank has established procedures to prevent conflicts of interest and to ensure the provision of high-quality research based on research objectivity and independence from outside influences. These procedures are documented in Danske Bank's research policies. Employees within Danske Bank's Research Departments have been instructed that any request that might impair the objectivity of research and independence from outside influence of research shall be referred to Research Management and the Compliance Department. Danske Bank's Research Departments are organised independently from and do not report to other business areas within Danske Bank.

Research analysts are remunerated in part based on the overall profitability of Danske Bank, which includes investment banking revenues, but do not receive bonuses or other remuneration linked to specific corporate finance or debt capital transactions.

Danske Bank, its affiliates, subsidiaries and staff may perform services for or solicit business from GomSpace and may hold long or short positions in, or otherwise be interested in, the financial instruments mentioned in this research report. The Equity and Corporate Bonds analysts of Danske Bank and undertakings with which the Equity and Corporate Bonds analysts have close links are, however, not permitted to invest in financial instruments that are covered by the relevant Equity or Corporate Bonds analyst or the research sector to which the analyst is linked.

Danske Bank, its affiliates and subsidiaries are engaged in commercial banking, securities underwriting, dealing, trading, brokerage, investment management, investment banking, custody and other financial services activities, may be a lender to GomSpace and have whatever rights as are available to a creditor under applicable law and the applicable loan and credit agreements. At any time, Danske Bank, its affiliates and subsidiaries may have credit or other information regarding GomSpace that is not available to or may not be used by the personnel responsible for the preparation of this report, which might affect the analysis and opinions expressed in this research report.

Danske Bank is a market maker and a liquidity provider and may hold positions in the financial instruments of the issuer(s) mentioned in this research report.

Parts of this research report have been disclosed to GomSpace for factual check.

As an investment bank, Danske Bank, its affiliates and subsidiaries provide a variety of financial services, including investment banking services. It is possible that Danske Bank and/or its affiliates and/or its subsidiaries might seek to become engaged to provide such services to GomSpace in the next three months.

Financial models and/or methodology used in this research report

Investment views and opinions in this research report are formed on the basis of a combined selection of discounted cash flow analysis, industry knowledge, peer group analysis and company-specific and market technical elements (events affecting both the financial and operational profile of the company). Forecasting of company sales and earnings is based on segmented bottom-up models using subjective views of relevant future market developments. In addition, the expected macroeconomic environment is taken into account. The output is aggregated into models for group profit and loss, balance sheets and cash flow estimates – all taking into account the recent development in historical research reports.

More information about the valuation and/or methodology and the underlying assumptions is accessible via www.danskebank.com/equityresearch.

Risk warning

Major risks connected with investment views or opinions in this research report, including a sensitivity analysis of relevant assumptions, are stated throughout the text.

Expected updates

This research product will be updated on a semi-annual basis as a minimum.

Completion and first dissemination

The completion date and time in this research report mean the date and time when the author hands over the final version of the research report to Danske Bank's editing function for legal review and editing.

The date and time of first dissemination mean the date and estimated time of the first dissemination of this research report. The estimated time may deviate up to 15 minutes from the effective dissemination time due to technical limitations.

See the back page of this research report for the date and time of first dissemination.

Recommendation structure

This report does not have a target price or a buy/sell recommendation but it does include a valuation discussion and a suggested valuation range.

Not for US distribution

Validity time period

This communication as well as previous communications referred to below are valid until the earlier of (a) dissemination of a superseding communication by the author, or (b) significant changes in circumstances following its dissemination, including events relating to the market or the issuer, which can influence the price of the issuer or financial instrument.

General disclaimer

This commissioned research report has been prepared by Danske Bank A/S. It is provided for informational purposes only and should not be considered investment, legal or tax advice. It does not constitute or form part of, and shall under no circumstances be considered as, an offer to sell or a solicitation of an offer to purchase or sell any relevant financial instruments (i.e. financial instruments mentioned herein or other financial instruments of any issuer mentioned herein and/or options, warrants, rights or other interests with respect to any such financial instruments) ('Relevant Financial Instruments').

This commissioned research report has been prepared independently and solely on the basis of publicly available information that Danske Bank A/S considers to be reliable but Danske Bank A/S has not independently verified the contents hereof. While reasonable care has been taken to ensure that its contents are not untrue or misleading, no representation or warranty, express or implied, is made as to and no reliance should be placed on the fairness, accuracy, completeness or reasonableness of the information, opinions and projections contained in this commissioned research report and Danske Bank A/S, its affiliates and subsidiaries accept no liability whatsoever for any direct or consequential loss, including without limitation any loss of profits, arising from reliance on this commissioned research report.

The opinions expressed herein are the opinions of the research analysts and reflect their opinion as of the date hereof. These opinions are subject to change and Danske Bank A/S does not undertake to notify any recipient of this research report of any such change nor of any other changes related to the information provided in this commissioned research report.

This commissioned research is not intended for, and may not be redistributed to, retail customers in the United Kingdom and may under no circumstances be distributed in the United States.

This research report is protected by copyright and is intended solely for the designated addressee. It may not be reproduced or distributed, in whole or in part, by any recipient for any purpose without Danske Bank A/S's prior written consent.

Disclaimer related to distribution in the United Kingdom

In the United Kingdom, this document is for distribution only to (I) persons who have professional experience in matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the 'Order'); (II) high net worth entities falling within article 49(2)(a) to (d) of the Order; or (III) persons who are an elective professional client or a per se professional client under Chapter 3 of the FCA Conduct of Business Sourcebook (all such persons together being referred to as 'Relevant Persons'). In the United Kingdom, this document is directed only at Relevant Persons, and other persons should not act or rely on this document or any of its contents.

Disclaimer related to distribution in the European Economic Area

This document is being distributed to and is directed only at persons in member states of the European Economic Area ("EEA") who are 'Qualified Investors' within the meaning of Article 2(e) of the Prospectus Regulation (Regulation (EU) 2017/1129) ('Qualified Investors'). Any person in the EEA who receives this document will be deemed to have represented and agreed that it is a Qualified Investor. Any such recipient will also be deemed to have represented and agreed that it has not received this document on behalf of persons in the EEA other than Qualified Investors or persons in the UK and member states (where equivalent legislation exists) for whom the investor has authority to make decisions on a wholly discretionary basis. Danske Bank A'S will rely on the truth and accuracy of the foregoing representations and agreements. Any person in the EEA who is not a Qualified Investor should not act or rely on this document or any of its contents.
